**2015 INDIANA MPO CONFERENCE**  
**OCTOBER 13-15, 2015**  
**HORIZON CONVENTION CENTER**  
**401 S HIGH STREET**  
**MUNCIE, INDIANA**

**CREATING HEALTHY COMMUNITIES: REDEFINING TRANSPORTATION FOR THE 21<sup>ST</sup> CENTURY**  
*A healthy community can refer to economic measures, environmental measures and/or social individual measures. Transportation plays a significant role in all three – businesses need to move goods and services, emissions and runoff impact air and water, and outdoor activities such as biking and walking improve environmental, physical and mental health. The Conference Committee believes that transportation planning and projects can promote living in such a way that we minimize our negative impact on the earth and the people we share it with, doing our best to preserve the world in its healthiest form for future generations. We hope the sessions provided have been educational and shown how Indiana is creating Healthy Communities through our local, state, federal, and private partnerships.*
